Improver for Dogs and Horses

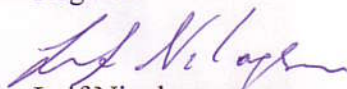

Regarding the E mail about the supplemental feed "Improver" for dogs and horses.

The Norwegian Food Safety Authority has reviewed the information and can confirm that "Improver" is classified as a supplemental feed. The feeds composition contains only approved substances that, with the exception of iron(II)fumerate, are not restricted for use in neither feed or for type of animal.

The quantity of iron(II)fumerate is well below the approved limit of 1250 mg/kg of feed

The product is in accordance with Norwegian legislation in which the European legislation is incorporated.

Regards

Leif Nicolaysen
Seniorinspektør
